Contents of Volume 41

Number 1, October 9, 1970

EN S. MACDONALD AND IRVING H. GOLDBERG. An Effect of Pactamycin on the Initiation of Protein Synthesis in Reticulocytes 1

ALTER P. HEMPFLING. Repression of Oxidative Phosphorylation in *Escherichia coli* B by Growth in Glucose and Other Carbohydrates 9

INA TAYLOR. The Specificity of the Vi-Phage II Bacteriolytic Enzyme 16

TH F. ITZHAKI. Structure of Deoxyribonucleoprotein as Revealed by its Binding to Polylysine 25

VID E. DRUM AND BERT L. VALLEE. Optical Properties of Catalytically Active Cobalt and Cadmium Liver Alcohol Dehydrogenases 33

GUTMAN, M. MAYR, R. OLTZIK, AND T. P. SINGER. Effect of ATP on the Redox Cycle of Respiratory Chain-Linked DPNH Dehydrogenase and the Localization of Coupling Site I 40

M. PARSONS AND M. A. RAFTERY. Ionization Behavior of the Catalytic Carboxyls of Lysozyme 45

ALTER SIERRALTA AND JOSÉ MINGUELL. Ribonuclease Activity in Rat Bone Marrow Nuclei 50

C. LAROSA, R. I. LEVY, P. HERBERT, S. E. LUX, AND D. S. FREDRICKSON. A Specific Apoprotein Activator for Lipoprotein Lipase 57

NDREW BECKER. An Endodeoxyribonuclease Induced in *E. coli* by Infection with λ *PBIO* Transducing Phages 63

VITOLS, V. A. BAUER, AND E. C. STANBROUGH. Ribonucleotide Reductase from *Saccharomyces cerevisiae* 71

S. KERWAR, CARLOS SPEARS, AND HERBERT WEISSBACH. Studies on the Initiation of Protein Synthesis in Animal Tissues 78

WANKA AND J. MOORS. Selective Inhibition by Cycloheximide of Nuclear DNA Synthesis in Synchronous Cultures of *Chlorella* 85

OSE M. LITMAN. An Unusual Exonuclease Activity Associated with *Micrococcus luteus* DNA Polymerase 91

ARBARA G. BEATTY AND J. TZE-FEI WONG. Synthesis and Assembly of Ribosomal Proteins at the Onset of Pyrimidine Starvation 99

I. CHUGUEV, V. D. AXELROD AND A. A. BAYEV. Stepwise Removal of Five Nucleotides from 5'-Half of Yeast Valine Transfer RNA and its Acceptor Activity 108

ANCY DEBRECINI, MARGARET T. BEHME, AND K. EBISUZAKI. A DNA-Dependent ATPase from *E. coli* Infected with Bacteriophage T_4 115

MES F. RIORDAN AND HIROSHI HAYASHIDA. Chemical Evidence for a Functional Carboxyl Group in Carboxypeptidase A 122

DNEY M. WOLFE AND N. RAPHAEL SHULMAN. Inhibition of Platelet Energy Production and Release Reaction by PGE_1, Theophylline and cAMP 128

. SWEET AND J. E. ZULL. Interaction of the Erythrocyte-Membrane Protein, Spectrin, with Model Membrane Systems 135

OSEPH P. MASCARENHAS. A New Intermediate in Plant Cell Wall Synthesis 142

ON B. CLEWELL AND DONALD R. HELINSKI. Existence of the Colicinogenic Factor-Sex Factor $ColI_b$-P9 as a Supercoiled Circular DNA-Protein Relaxation Complex 150

HOEBE-FIELDING AND C. FRED FOX. Evidence for Stable Attachment of DNA to Membrane at the Replication Origin of *Escherichia coli* 157

. E. COFFMAN AND BRUCE W. STAVENS. Solvent-Induced EPR Anisotrophy Change of the Non-Heme Chromophore of Spinach Ferredoxin 163

ONG MO MOON, JAMES F. COLLINS, AND ELIZABETH S. MAXWELL. Discrimination by Rat Liver Aminoacyltransferase I Against Met-$tRNA_{F^*}$ 170

ATOSHI NAKAMURA. Initiation of Sulfite Oxidation by Spinach Ferredoxin-NADP Reductase and Ferredoxin System: A Model Experiment on the Superoxide Anion Radical Production by Metalloflavoproteins 177

ARRY E. BOCKSTAHLER AND C. DAVID LYTLE. Ultraviolet Light Enhanced Reactivation of a Mammalian Virus 184

HONG-MAW CHEN AND JAMES OFENGAND. Inactivation of the Tu-GTP Recognition Site in Aminoacyl-tRNA by Chemical Modification of the tRNA 190

. K. MAY AND W. H. ELLIOTT. Synthesis and Properties of a Protoplast-Bursting Factor from *Bacillus amyloliquefaciens* 199

P. V. Sane and R. B. Park. Purification of Photosystem I Reaction Centers from Spinach Stroma Lamellae 20
Richard G. Nelson and W. Curtis Johnson, Jr. Conformation of DNA in Ethylene Glycol 21
B. D. Wilson and R. L. Wright. Mechanism of TSH Action: Effects of Dibutyryl Cyclic AMP on RNA Synthesis in Isolated Thyroid Cells 21
Carol Warner and Verne Schumaker. Detection of Two Species of Antibody Molecules with the same Specificity 22
Celia White Tabor and Herbert Tabor. The Complete Conversion of Spermidine to a Peptide Derivative in *Escherichia coli* 23
B. H. McFarland and G. Inesi. Studies of Solubilized Sarcoplasmic Reticulum 23
R. C. Tribhuvan, A. K. Pilgaokar, D. S. Pradhan, and A. Sreenivasan. Effect of Phenethyl Alcohol on Induction of Alkaline Phosphatase in *Escherichia coli* 24
L. J. Fowler, Catherine M. Peach, and A. J. Bailey. *In vitro* Studies on the Enzymic Biosynthesis of the Collagen Crosslinks 25
H. Weissman and S. Ben-Or. Regulation of Glutamine Synthetase in the Embryonic Neural Retina in Organ Culture 26
Pierre Gaye and Robert Denamur. Preferential Synthesis of β Lactoglobulin by the Bound Polyribosomes of the Mammary Gland 26

Number 2, October 23, 1970

Raj K. Gupta and Alfred G. Redfield. NMR Double Resonance Study of Azidoferricytochrome *c* .. 27
H. Steffen and Melvin Calvin. The Origin of the Long Wavelength Absorption Bands in Purple Bacteria 28
Clive Little, Radu M. Olinescu, and Peter J. O'Brien. Inhibition of Glutathione Peroxidase by Coenzyme A 28
E. L. Tolman, L. E. Metzger, and L. S. Jefferson. A Stimulated Rate of Gluconeogenesis in Perfused Livers of Hypophysectomized Rats 29
P. E. Kolattukudy. Biosynthesis of a Lipid Polymer, Cutin: The Structural Component of Plant Cuticle 29
William S. Bradshaw and John Papaconstantinou. Differential Incorporation of 5-Bromodeoxyuridine into DNA Puffs of Larval Salivary Gland Chromosomes in *Rhynchosciara* 30
L. Rimai and M. E. Heyde. An Investigation by Raman Spectroscopy of the Base-Proton Dissociation of ATP in Aqueous Solution and the Interactions of ATP with Zn^{++} and Mn^{++} 31
R. A. Long, F. Hruska, H. D. Gesser, J. C. Hsia, and R. Williams. Membrane Condensing Effect of Cholesterol and the Role of Its Hydroxyl Group 32
James F. Kane and Roy A. Jensen. The Molecular Aggregation of Anthranilate Synthase in *Bacillus subtilis* 32
Harlow H. Daron. The Position of the Double Bond in Unsaturated Fatty Acids of a Thermophilic *Bacillus* Species 33
Kozo Narita and C. Y. Lee. The Amino Acid Sequence of Cardiotoxin from Formosan Cobra *(Naja naja atra)* Venom 33
Tomoko Ohnishi. Induction of the Site I Phosphorylation *in Vivo* in *Saccharomyces carlsbergensis* . 34
J. Ramachandran. Melanocyte Stimulating Activities of the *o*-Nitrophenyl Sulfenyl Derivatives of Adrenocorticotropin and [5-Glutamine]-α-Melanotropin 35
J. Ramachandran and Virginia Lee. Divergent Effects of *o*-Nitrophenyl Sulfenyl ACTH on Rat and Rabbit Fat Cell Adenyl Cyclases 35
Audrey Stevens. An Isotopic Study of DNA-Dependent RNA Polymerase of *E. coli* Following T4 Phage Infection 36
K. W. Bock and P. Siekevitz. Turnover of Heme and Protein Moieties of Rat Liver Microsomal Cytochrome b_5 37
Felicia Ying-Hsiueh Wu, Shiao-Chun Tu, Cheng-Wen Wu, and Donald B. McCormick. Characteristics of the Fluorescence Spectra of Apoenzyme and Flavin Portions of D-Amino Acid Oxidase 38
M. Erecinska, D. F. Wilson, Y. Mukai, and B. Chance. Oxidation-Reduction Midpoint Potentials of the Mitochondrial Flavoproteins 38
Hiroyasu Nakata and Shin-Ichi Ishii. Substrate Activation in the Trypsin-Catalyzed Hydrolysis of Benzoyl-L-Arginine *p*-Nitroanilide 39

EAN DELCOUR AND JOHN PAPACONSTANTINOU. A Change in α-Crystallin Subunit Composition in Relation to Cellular Differentiation in Adult Bovine Lens 401
OSHIKATSU MUROOKA, KOZI SETO, AND TOKUYA HARADA. *O*-Alkylhomoserine Synthesis from *O*-Acetylhomoserine and Alcohol 407
UENTIN H. GIBSON AND ROBERT D. GRAY. The Reaction of Inositol Hexaphosphate with Hemoglobin 415
OHN S. OLSON AND QUENTIN H. GIBSON. Organic Phosphates and the Reaction of N-Butyl Isocyanide with Human Hemoglobin 421
. GRAVELAND. Modification of the Course of the Reaction between Wheat Flour Lipoxygenase and Linoleic Acid due to Adsorption of Lipoxygenase on Glutenin 427
IDNEY M. HECHT, ROBERT M. BOCK, NELSON J. LEONARD, RUTH Y. SCHMITZ, AND FOLKE SKOOG. Cytokinin Activity in $tRNA^{Phe}$ 435
ORIS WEINSTEIN. The Evolution of Papain 441
. W. BECKER, Y. T. THATHACHARI, AND P. G. SIMPSON. Molecular Conformation of L-DOPA 444
ASAYOSHI OKUDE AND SADAAKI IWANAGA. Carboxyl-Terminal Residues of Fibrinogen and Fibrin .. 450
LAND S. MONTENECOURT AND DONALD T. DUBIN. The Ribosomal Subunits of Hamster Cell Mitochondria 458
ALAIN DUPAIX, JEAN-JACQUES BÉCHET, AND COLETTE ROUCOUS. Separation of Polar, Steric and Specific Effects in the α-Chymotrypsin-Catalyzed Hydrolysis of Acyl-Substituted p-Nitrophenyl Esters 464
ONALD J. CUMMINGS. Synchronization of *E. coli* K 12 by Membrane Selection 471
. D. KORANT, K. K. LONBERG-HOLM, AND S. HALPEREN. Structural Polypeptides of Three Rhinoviruses 477
LVIN HARPER AND ANDREW H. KANG. Studies on the Specificity of Bacterial Collagenase 482
ILLIAM C. KENNEY, W. H. WALKER, EDNA B. KEARNEY, E. ZESZOTEK, AND T. P. SINGER. Amino Acid Sequence at the Active Center of Succinate Dehydrogenase 488
. RIMAI, R. G. KILPONEN, AND D. GILL. Resonance-Enhanced Raman Spectra of Visual Pigments in Intact Bovine Retinas at Low Temperatures 492
ALPH J. BERNACKI AND H. BRUCE BOSMANN. Warfarin and Vitamin K Accelerate Protein and Glycoprotein Synthesis in Isolated Rat Liver Mitochondria *in Vitro* 498
TURE BRISHAMMAR. Identification and Characterization of an RNA Replicase from TMV-Infected Tobacco Leaves 506
AHANGIR A. KHAWAJA AND AARNE RAINA. Effect of Spermine and Magnesium on the Attachment of Free Ribosomes to Endoplasmic Reticulum Membranes *in Vitro* 512
RRATA 519

Number 3, November 9, 1970

Author Index 16

Information for Contributors

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

In order to assure rapid and accurate publication, it is essential that manuscripts be prepared according to the instructions given below. Manuscripts which do not conform to these specifications may have to be returned for retyping.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8½ x 11″ high quality paper (the complete manuscript, including space occupied by figures and tables, should be not more than 8 pages long).

Summary: The article must be preceded by a brief summary, typed single-spaced, not to exceed 10 lines in length (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Since articles are reproduced directly from manuscripts, the latter must be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used, and special care should be taken to insure a sharp, clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division, and punctuation.

Manuscripts should be double-spaced, on only one side of the sheet; **references, footnotes, and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6½″ wide by 9½″ long.

Use of Symbols and Abbreviations. Abbreviations except for those in the Commission on Biochemical Nomenclature Document #1 (*Arch. Biochem. Biophys.* **115,** 1-12 (1966)) must be defined, and ambiguous abbreviations such as TCA, or P to signify anything but phosphate, should be avoided. Authors are urged to use chemical formulas, such as CCl_3COOH, wherever possible. If improper abbreviations are used it may be necessary to return manuscripts for retyping, which will delay their publication.

Footnotes should be typed single-spaced, at the foot of the page on which they are mentioned in the text. References and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. Photographs are acceptable. Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink. Illustrations and tables should be submitted on separate sheets. **Do not attempt to insert the figures, figure legends, or tables into the text.** This will be done by the Publishers.

All drawings should be done in black ink on white paper or tracing cloth; they must be planned for reduction to a width of not more than 5″. Final size of the printed page is 5½ x 8⅜″; figures must be planned to fit these proportions.

Graph paper, if used, should be ruled in blue; grid lines that are to show in the final reproduction should be inked in black. High quality glossy prints are acceptable.

Page Numbers and Headings. Page numbers should be written lightly in blue (not typed) at the bottom of each page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature may be cited by number and listed in numerical order in a single-spaced list placed at the end of the manuscript. Abbreviations of journal titles should be those used in *Chemical Abstracts.*

Mailing. To avoid creasing, please place manuscripts between cardboards when mailing.

Reprints

Reprint order forms are sent to the authors immediately upon acceptance of their manuscripts. The price list is included.
